3. Reasons for the distribution and the revision to forecast

To further enhance shareholder returns, the Company has adopted, starting from the fiscal year ending March 2027, a basic policy of progressive dividends with a payout ratio benchmark of 35%.

Under this policy, and in light of its first-half business performance, the Company has decided to set the interim dividend per share for the fiscal year ending March 2027 at 33.61 yen, an increase of 2.69 yen from the previous forecast (15.59 yen increase year-over-year). The year-end dividend forecast has been revised to 36.73 yen, an increase of 8.20 yen from the previous forecast (1.77 yen increase year-over-year), due to the revision of the consolidated earnings forecast for the fiscal year ending March 2027, as described in the “Announcement Regarding the Revision of Consolidated Business Forecast” released today. As a result, the annual dividend is expected to be 70.34 yen per share (17.36 yen increase year-over-year), 10.89 yen higher than the previous forecast.
